Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the primary reason for allowance of the claims is the combination of the utilization of one or multiple B-links in place of lower capacity A-links, each media gateway comprising its own point code, and the aggregation of signaling control at a switch. Thereby, off-loading signaling control functionality and creating a more robust and efficient switching system. As supported on page 10, line 10 to page 11, line 13 and Figures 2 and 3 of the Applicant's specification. These limitations are found in every independent claim. And, the previously mentioned limitations are not found in the prior art references.
